PROJECTS

- **DocSecure**
 - DocSecure is a powerful tool that allows us to upload and validate PDF documents securely against entries in the blockchain.
 - The tool reads the pdf, creates a hash of the data of the PDF and then stores it on the blockchain.
 - While creating the hash of the pdf, user key is used to sign the transaction which is generated at the time of registration.
- **CodeBattles**
 - a full-stack web application using React.js, Node.js, and MongoDB, allowing users to create, browse, and enroll in courses, while also providing an integrated coding environment for solving problems directly on the platform.
 - Implemented user authentication and authorization features following best practices to ensure secure access to course content and coding exercises.
- **ChatApp**
 - Stay connected with friends, family and colleagues in real time using the robust socket.io technology.
 - User friendly and responsive interface made using material UI.
 - includes features like Dark & Light Mode, Group Chatting, etc.
